

GLOBAL INTELLIGENCE

Combining the physical presence and reassurance of Constellis assets worldwide and the innovative Kinetic Global (formerly LifeLine Response) technology, we have you covered.

Workplace violence, geopolitical unrest, terrorism, assault, kidnapping, stalking and violent crime are all factors that affect the safety of your company's greatest assets - your employees.

The Constellis/Kinetic Global (formerly LifeLine Response) platform is a robust solution to these problems. Through real-time intelligence and on-the-ground emergency support, we enable company executives to avert problems, respond quickly and take charge of any situation that envelops their personnel.

This vital service provides unparalleled safety features entrusted by dignitaries, overseas workforces, government agencies, Fortune 500 corporations and International organizations worldwide.

COMPREHENSIVE, VISUAL AND ON DEMAND

The Kinetic Global virtual solution resides on the employees' smartphones, enabling immediate situational awareness and delivering on-demand protection when your people find themselves in vulnerable situations. This ground-breaking mobile technology quickly alerts emergency responders who can attend the scene even if the victim is unable to call for help or provide their location.

THE APPLICATION CAN BE CUSTOMIZED WITH SPECIALIST MODULES

Active Triangulation

When the worst happens, track threat events and locate individuals anywhere in the world instantly when they intersect with a potential threat.

Medical Response

When an employee falls ill or needs medical assistance, they can simply trigger an alert and our 24/7 dispatchers will introduce them to our team of doctors.

Travel Security

Our travel portal allows you to see threat events while seamlessly enabling you to make mass notifications and request information from the traveller, to truly understand your exposure.

Global Threat/Event Notifications

Design threat feeds with our full suite of proprietary threat briefings augmented by a ground-breaking AI and machine learning system.

Geo-Fenced Mass Communication

Communicate threats or updates to employees based on their geographic location.

Live Heat Map

Monitor real-time movement of employee travelers on the map, and use predictive analytics to forecast trends.

Analytics and History

Track trends and map patterns with forensic details in the event of incidents or as a proactive measure to anticipate where future incidents may happen.

Facility Intelligence

Our facility intelligence portal monitors threats to fixed assets in the same way that the travel portal does with personnel.

GLOBAL REACH

We have 24/7 Operations Centers in North Carolina, Pennsylvania and Abu Dhabi staffed by security professionals with multilingual capabilities. We make on average more than 4,000 outbound calls per day in response to our users. Our specialist risk and crisis professionals are strategically located in every corner of the globe to be there when and where you need them.

ABOUT CONSTELLIS

Constellis protects critical priorities safely and efficiently around the world. Operating in 30 countries and based in the Washington D.C. area, our 22,000 Constellis employees bring unparalleled dedication and passion for creating a safer world and upholding the highest standards of compliance, quality and integrity.
